SAMER SAMIR GODA

Software Engineer | React • Next.js • TypeScript • Java • Spring Boot • AI/LLM

Cairo, Egypt • +20 1147196733 • samergoda421@gmail.com • linkedin.com/in/samer-goda • github.com/samergoda

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience building scalable web applications using React, Next.js, Vue.js, TypeScript, Java, and Spring Boot. Experienced in frontend architecture, micro-frontends, performance optimization, and API integration. Led the migration of a large React application to a micro-frontend architecture, enabling independent team deployments. Also working with AI technologies including LLMs, RAG, LangChain, embeddings, and vector databases. Focused on writing clean, scalable, and maintainable software.

TECHNICAL SKILLS

Frameworks & libraries — React.js, Vue.js, Next.js, Redux Toolkit, React Query, React Hook Form, next-intl, Spring boot, Spring
Languages — JavaScript (ES6+), TypeScript, HTML5, CSS3 / SCSS, Java
Styling & UI — Tailwind CSS, shadcn/ui, Bootstrap, Styled-Components
APIs & data — REST, GraphQL, gRPC, Fetch API, Micro-services
Architecture — Micro-frontend (Module Federation), PWA, WCAG accessibility, i18n
Tooling & DevOps — Vite, Webpack, Turbopack, GitHub Actions (CI/CD), Jest, Lighthouse, SonarQube, Jira, Agile/Scrum
AI / LLM — RAG, LangChain, LLM Applications, Embeddings, Vector Databases, AI Agents
Database — MySQL, PostgreSQL, SQL, JPA, Hibernate, Mongodb, redis

WORK EXPERIENCE

Software Engineer (Frontend Engineer) | Boutiqaat — eCommerce Platform, Kuwait

Jan 2026 – Present • Remote-friendly

- Architected and led migration of a monolithic React codebase to a Module Federation micro-frontend structure, enabling four independent teams to deploy features approximately 60%.
- Refactored existing features into independently deployable micro-frontend modules, reducing release cycle times.
- Worked on a Next.js (v16) application revamp, improving structure, routing, and component organization for better maintainability.
- Implemented UI fixes and enhancements across multiple production modules, ensuring high availability and consistent user experience.

Front-End Developer | Numinix — eCommerce Development Services, Canada

Jul 2023 – Dec 2025 • Remote

- Optimized front-end performance via advanced AJAX and API integration (REST, GraphQL, gRPC), achieving 99%+ uptime during peak traffic and improved Lighthouse performance scores from ~70 to 90+
- Developed scalable front-end solutions including modular micro-frontend plugins and a reusable design system in Vue and React, ensuring UI consistency and accelerating multi-team development.
- Built real-time management tools, including an admin dashboard with live insights, enhancing operational efficiency and platform reliability.

Front-End Developer | Freelance

Aug 2022 – Jul 2023 • Remote

- Built responsive landing pages and SPAs using React, Next.js, Tailwind CSS, and vanilla JavaScript, improving performance scores and user engagement.

Education

Pre-Master's Student - Software Engineer
Cairo University, Egypt • Sep 2026 – present

Bachelor of Arts — Geography
Alexandria University, Egypt • Sep 2017 – Jul 2021

PROJECTS

MapWhizz - Demo | GitHub Link **— npm Package**
An open-source npm package for visualizing geographical data using interactive SVG maps. Enables developers to display country-level data with minimal setup — ideal for analytics dashboards and data visualization projects.

Portfolio - Demo | GitHub Link **— Personal Portfolio**
This is a showcase of all my projects, hosted on GitHub. It demonstrates my proficiency in React and front-end design. I built a responsive, well-structured portfolio to highlight my skills and experience.

Skills Tracker - Demo | GitHub Link **— Skills Tracker**

Tech: Next.js "app" router, Turso, Sqlite, React Server Components, server actions, authentication and authorization (RBAC), dashboard, shadcn/ui, i18 translation, Tailwind CSS, Clean Architecture
Developed with Next.js "app" router and Clean Architecture, utilizing Turso and SQLite with React Server Components and server actions. Features include robust authentication, an interactive dashboard, shadcn/ui components, Tailwind CSS styling, and i18n support.

Flower App - Demo | GitHub Link **— E-Commerce Web Application**
Tech: Next.js, i18n, React Query, NextAuth, shadcn/ui, React Hook Form, Server Actions, API Route Handlers
Modern flower e-commerce app focused on performance, scalability, and seamless UX. Integrated secure authentication, dynamic routing, and real-time updates.

CERTIFICATIONS

- Software Engineering Essentials — IBM (May 2024)
- Front-End Development Diploma — Route Academy (Jul – Dec 2022)
- The Complete JavaScript Course 2023: From Zero to Expert — Udemy (Jan – May 2023)
- Responsive Web Design — freeCodeCamp (Jan – Mar 2023)
- Front-End Web Development Ultimate Guide — Udemy (May – Nov 2022)
